Journal of Wind Engineering and Industrial Aerodynamics, 49 (1993)
Elsevier

Contents Volume 49 (1993)

Preliminary pages
Introduction

Invited Papers
Bluff-body aerodynamics as applied to vehicles
K.R. Cooper (Ottawa, Ont., Canada) 1
Current state of computational bluff body aerodynamics
D. Laurence and J.D. Mattei (Chatau, France) 23
Turbulence and the leading edge phenomenon
W.H. Melbourne (Clayton, Vic., Australia) 45
Bluff-body aerodynamics and turbulence
Y. Nakamura (Kasuga, Japan) 65
Perspectives on bluff-body aerodynamics
A. Roshko (Pasadena, CA, USA) 79
The generation of sound by turbulent and separated flows
M.S. Howe (Boston, MA, USA) 101
Aerodynamic damping and vortex excitation on an oscillating prism in turbulent shear flow
B.J. Vickery (London, Ont., Canada) and A. Steckley (Waterloo, Ont., Canada) ... 121
Bluff-body aerodynamics influence on transport and diffusion of hazardous gases
R.N. Meroney (Fort Collins, CO, USA) 141

Fundamental Studies
Vortex induced oscillatory response of a circular cylinder due to interference effects
B.H.L. Gowda, V. Sreedharan and S. Narayanan (Madras, India) 157
Cross flow response of slender circular-cylindrical structures: prediction models and recent experimental results
H.M. Blackburn and W.H. Melbourne (Clayton, Australia) 167
Extension of the Lever & Weaver's unsteady analytical model to the fluidelastic instability of arrays of flexible cylinders
J.L. Parrondo, C. Santolaria (Gijón, Spain) and E. Egusquiza (Barcelona, Spain) .. 177
Flow around rectangular cylinders: pressure forces and wake frequencies
C. Norberg (Gothenburg, Sweden) 187
Vortex shedding mechanism from prisms having H and I sections
T. Nakagawa and R. Nakagawa (Ishikawa, Japan) 197
Nozzle jet flow-induced vibration of single circular cylinders and twin circular cylinders
Y. Ikegami. K. Fujita (Takasago, Japan) and M. Osashi (Kobe, Japan) 207
The effect of forcing on the time-averaged structure of the flow past a surface-mounted bluff plate
R.M. Kelso, T.T. Lim and A.E. Perry (Parkville, Vic., Australia) 217
Structure of turbulent leading-edge separation bubble of a blunt circular cylinder and its response to sinusoidal disturbances
M. Kiya, O. Mochizuki, Y. Ido and H. Kosaku (Sapporo,Japan) 227

0167-6105/93/$06.00 © 1993 Elsevier Science Publishers B.V. All rights reserved.

Spatial evolution of the separated shear layer from a square leading-edge flat plate
J. Soria (Highett, Australia), M. Sheridan (Waterloo, Ont., Canada) and J. Wu (Clayton, Australia) 237
Basic study of blockage effects on bluff bodies
H. Utsunomiya, F. Nagao, M. Noda (Tokushima, Japan) and Y. Ueno (Kitahama, Japan) 247
Heat transfer enhancement in transitional channel flow
M.V. Zagarola, A.J. Smits and G.E. Karniadakis (Princeton, NY, USA) 257
Effect of bluff body wakes on skin friction and surface heat transfer in a turbulent boundary layer
V. Baskaran (Salisbury, Australia) and P. Bradshaw (Stanford, USA) 269
Measurements of cross-correlation in separated flows around bluff cylinders
R. Sankaran (Townsville, Qld., Australia) and E.D. Jancauskas (Rockhampton, Qld., Australia) 279
Pressures on surface-mounted prisms: the effects of incident turbulence
H.W. Tieleman (Blacksburg, VA, USA) 289
Characteristics of large pressures in regions of flow separation
J.D. Ginger and C.W. Letchford (Brisbane, Qld., Australia) 301
Base pressure coefficients for flows around rectangular plates
K. Hourigan, M.C. Thompson, M.C. Welsh (Highett, Vic., Australia), R. Mills, J. Sheridan (Clayton, Vic., Australia) and P. Dilin (Huainan, ROC) 311
Investigation of stationary and nonstationary wind data using classical Box–Jenkins models
D.A. Smith and K.C. Mehta (Lubbock, TX, USA) 319
Analysis of unsteady flows past bluff bodies
A. Leder and D. Geropp (Siegen, Germany) 329
The effects of three-dimensional imposed disturbances on bluff body near wake flows
P.W. Bearman and N. Tombazis (London, UK) 339
Experiments on flow past rough circular cylinders at large Reynolds Numbers
W.C.L. Shih (Torrance, CA, USA), C. Wang (Santa Ana, CA, USA), D. Coles and A. Roshko (Pasadena, CA, USA) 351
Aerodynamic forces acting on three circular cylinders having different diameters closely arranged in line
T. Igarashi (Yokosuka, Japan) 369
Two circular cylinders in high turbulence flow at supercritical Reynolds number
Z.F. Gu, T.F. Sun (Beijing, China), D.X. He and L.L. Zhang (Sichuan, China) 379
The aerodynamic disturbance caused by the free-ends of a circular cylinder immersed in a uniform flow
T.A. Fox, C.J. Apelt and G.S. West (St. Lucia, Qld., Australia) 389
Experimental investigation of vortex shedding from a plate
J. Wu, J. Sheridan (Clayton, Australia), J. Soria, M.C. Welsh and K. Hourigan (Highett, Australia) 401

Vehicle aerodynamics

Comparison of road and wind-tunnel drag reductions for commercial vehicles
S. Watkins, J.W. Saunders and P.H. Hoffman (Melbourne; Australia) 411
Vortex optimisation of slotted tops and cavities of two different open rail wagons
J.W. Saunders, S. Watkins and R.J. Cassar (Melbourne, Australia) 421
Effect of Reynolds number on the aerodynamic forces on a container model
J.-L. Peters (München, Germany) 431
The behaviour of road vehicles in unsteady cross winds
C.J. Baker (Nottingham, UK) 439

Validated computational aerodynamics for trains
L.T. Kisielewicz (Tokyo, Japan) and A. Tabbal (Rungis Cedex, France) 449

Bridge aerodynamics

An experimental study on aerodynamic improvements for edge girder bridges
Y. Sakai, K. Ogawa, H. Shimodoi and T. Saitoh (Akashi City, Japan) 459
Mechanism of and turbulence effect on vortex-induced oscillations for bridge box girders
M. Matsumoto, N. Shiraishi, H. Shirato, S. Stoyanoff and T. Yagi
(Kyoto, Japan) 467
Effects of turbulent flows on vortex-induced oscillation of bridge girders with basic sections
M. Kawatani, H. Kim, H. Uejima (Suita, Japan) and H. Kobayashi
(Kyoto, Japan) 477
Aerodynamic stability of Trans-Tokyo Bay highway bridge
S. Hirai, A. Honda (Nagasaki, Japan), H. Kato, O. Yoshida and I. Okauchi
(Tokyo, Japan) 487
A device for suppressing wake galloping of stay-cables for cable-stayed bridges
T. Yoshimura, T. Wakasa (Fukuoka, Japan), M.G. Savage and H. Tanaka
(Ottawa, Ont., Canada) 497
Application of a new wind turbulence model in predicting motion stability of wind-excited long-span bridges
Y.K. Lin, Q.C. Li and T.C. Su (Boca Raton, FL, USA) 507
A review of model and full scale tests of a cable-stayed bridge and a traffic sign gantry
A.J. Persoon (Amsterdam, The Netherlands) 517
Aerodynamic stability of Kansai International Airport access bridge
A. Honda, N. Shiraishi, M. Matsumoto (Kyoto, Japan), Y. Fuse, K. Sumi
(Osaka, Japan) and N. Sasaki (Hiroshima, Japan) 533
Aerodynamic stability of Nagoya Port Bridges
T. Kazama (Tokyo, Japan), Y. Momiyama, Y. Suzuki (Nagoya, Japan),
A. Honda and S. Hirai (Nagasaki, Japan) 543
Improvement of aerodynamic instability of cable-stayed bridge deck by separated flows mutual interference method
Y. Kubo, K. Honda, K. Tazaki and K. Kato (Tobata Kitakyushu, Japan) 553
Aerodynamic efficiency of triangular fairing on box girder bridge
F. Nagao, H. Utsunomiya, S. Manabe (Tokushima, Japan) and T. Oryu
(Hyogo, Japan) 565
Aerodynamic derivatives of coupled/hybrid flutter of fundamental structural sections
M. Matsumoto, N. Shiraishi, H. Shirato, Y. Niihara (Kyoto, Japan) and
K. Shigetaka (Saitama, Japan) 575
